

Research in Astronomy and Astrophysics

Vol. 25 No. 2

February 2025

CONTENTS

New Insights on Gamma-Ray Burst Radiation Mechanisms from Multiwavelength Observations	
<i>Yu-Hua Yao, Fang-Sheng Min, Shi Chen and Yi-Qing Guo</i>	025001
GRB 201223A: Implication of Fallback Accretion onto the Newborn Black Hole from its Multiband Afterglow	
<i>Tian-Hua Lu, Dong Xu, Wei-Hua Lei, Shao-Yu Fu, Shuai-Qing Jiang et al.</i>	025002
The Stellar Abundances and Galactic Evolution Survey (SAGES) III	
<i>Chun Li, Zhou Fan, Gang Zhao, Wei Wang, Jie Zheng et al.</i>	025003
Two Repeated Quasi-periodic Oscillations in the FSRQ S5 1044+71 Observed by TESS	
<i>Jun-Jie Wang, Ting-Feng Yi, Yangwei Zhang, He Lu, Yuncai Shen et al.</i>	025004
Improving Image Quality of the Solar Disk Imager (SDI) of the Ly α Solar Telescope (LST) Onboard the ASO-S Mission	
<i>Hui Liu, Hui Li, Sizhong Zou, Kaifan Ji, Zhenyu Jin et al.</i>	025005
O'Connell Effect and Period Variations on Solar-like Contact Binary EF Boo	
<i>Jing-Jing Wang, Meng Guo, Xiao-Man Tian and Bin Zhang</i>	025006
First Search for Pulsed CH Maser Emission Stimulated by a Pulsar	
<i>Mengting Liu, Di Li, J. R. Dawson, Joel M. Weisberg, George Hobbs et al.</i>	025007
LAMOST Medium-resolution Spectroscopic Survey of Galactic Open Clusters (LAMOST-MRS-O): An Overview of Survey Plan and Preliminary Results	
<i>Xi Zhang (张茜), Chengzhi Liu (刘承志), Jing Zhong (钟靖) et al.</i>	025008
A Combined Smoothing Method of Ensemble Pulsar Timescale and Application for Pulsar Atomic Clock Combined Timescale	
<i>Tinggao Yang, Minglei Tong, Bian Li, Zhehao Zhang, Xingzhi Zhu et al.</i>	025009
On the Response of Massive Main Sequence Stars to Mass Accretion and Outflow at High Rates	
<i>Ealeal Bear and Noam Soker</i>	025010
Modified Masses and Parallaxes of the Close Visual Triple System HD 2893	
<i>Suhail Masda, Mashhoor Al-Wardat, Hussam Aljboor, L. R. Benchi, Mariam I. Yassin et al.</i>	025011
Studying Thermal and Dynamical Stability of Interacting Rényi and Tsallis Holographic Dark Energy Models in LTB Inhomogeneous Universe	
<i>Mohamed Abdelrashied, Ayman Aly and Mustafa Selim</i>	025012
Relativistic Low Angular Momentum Advective Flows Onto Black Hole and Associated Observational Signatures	
<i>Jun-Xiang Huang and Chandra B. Singh</i>	025013
Star Formation Efficiency of Blue Compact Galaxies Through (OII), (H α), (IR), and 1.4 GHz Radio Continuum	
<i>Gemechu Muleta Kumssa</i>	025014
Detection of Emission Line Galaxies in the Slitless Spectra of HST and CSST	
<i>Kaiyuan Chen, Shuairu Zhu, Linhua Jiang and Zhenya Zheng</i>	025015
Spectroscopic Study of the Late B-type Eclipsing Binary System AR Aurigae A and B: Towards Clarifying the Differences in Atmospheric Parameters and Chemical Abundances	
<i>Yoichi Takeda</i>	025016
Research on Adjustable Cold View Field Diaphragm in Optical System with Linear Array Detector in AIMS	
<i>Lianwei Zhao, Meng Mou, Zhanhu Wang, Qing Fan, Chenjun Zhang et al.</i>	025017
BYSpec: An Automatic Data Reduction Package for BFOSC and YFOSC Spectroscopic Data	
<i>Zi-Chong Zhang, Jun-Bo Zhang, Ju-Jia Zhang, De-Yang Song, Jing Chen et al.</i>	025018
Model—Independent Probe of Cosmic Distance Duality Relation	
<i>Savita Gahlaut</i>	025019
Core Mass Function in View of Fractal and Turbulent Filaments and Fibers	
<i>Xunchuan Liu (刘训川), Tie Liu, Xiaofeng Mai, Yu Cheng, Sihan Jiao et al.</i>	025020
Constraints on Baryon Density from the Effective Optical Depth of High-redshift Quasars	
<i>Wen-Fei Liu, Yuan-Bo Xie, Zhi-E Liu, Jin Qin, Kang Jiao et al.</i>	025021
Multi-wavelength Study for Gamma-Ray Nova V1405 Cas	
<i>Zi-Wei Ou, Pak-Hin Thomas Tam, Hui-Hui Wang, Song-Peng Pei and Wen-Jun Huang</i>	025022
Jets are the Most Robust Observable Ingredient of Common Envelope Evolution	
<i>Noam Soker</i>	025023
Long-period Double-lined Eclipsing Binaries: The System V454 Aur with the Secondary Eclipse Caused by the Occultation of the Hotter Component	
<i>Alexei Y. Kniazev, Oleg Malkov, Stanislav Gorda, Leonid N. Berdnikov and Ivan Y. Katkov</i>	025024
Towards Optimization and Assessment of the Chinese New-generation VLBI Network for Earth Orientation Parameters Monitoring	
<i>Hao Xiang, Zhong-Kai Zhang, Lan Du, Ze-Jun Liu and Xu-Qiao Wang</i>	025025
