

Research in Astronomy and Astrophysics

Vol. 25 No. 6

2025 June

CONTENTS

Research Papers

LGRBs Born in Ultra-compact Binary System: Companion's Long-term Tidal Force and Periodicity in GRB Afterglows <i>Tian-Ci Zheng, Xiang-Dong Li, Da-Ming Wei and Zhi-Ping Jin</i>	065001
A Widely Applicable Galaxy Group Finder Using Machine Learning <i>Juntao Ma, Jie Wang, Tianxiang Mao, Hongxiang Chen, Yuxi Meng, Xiaohu Yang and Qingyang Li</i> ...	065002
An Analysis of the Seeing Conditions at Platform C of the Lenghu Site <i>Tian Lan, Licai Deng, Taoran Li, Fan Yang, Fei He et al.</i>	065003
AI Method for LAMOST Fiber Detection Based on Front Illumination <i>Zhangze Chen, Yihan Song, Ali Luo, Guanru Lv and Haotong Zhang</i>	065004
An Iteration Method for Astronomical Image Deconvolution and Reconstruction <i>F. Sine, M. Lu and L. Zhang</i>	065005
Comprehensive Analysis of Solar-terrestrial Impacts of Small-amplitude Program-processed Forbush Decreases <i>E. U. Iyida, O. Okike, I. O. Eya, E. Proven-Adzri, D. Y. Klutse et al.</i>	065006
Peeking Under the Clouds: Is Exoplanet Imaging with the Solar Gravitational Lens Feasible? <i>Viktor T. Toth</i>	065007
A Cosmological Full-shape Power Spectra Analysis Using Pre- and Postreconstructed Density Fields <i>Weibing Zhang, Ruiyang Zhao, Xiaoyong Mu, Kazuya Koyama, Ryuichi Takahashi et al.</i>	065008
Suzaku Observation of Merging Clusters A222 and A223 <i>Yanling Chen, Wei Cui, Aurora Simionescu, Rui Huang and Dan Hu</i>	065009
Polarization Studies in Different Blazar Types. I. Correlation Between Optical Brightness and Polarization Degree <i>E. A. Shkodkina, S. S. Savchenko, D. A. Morozova, S. G. Jorstad, G. A. Borman et al.</i>	065010
A Retrieval-augmented Analysis Framework for Target Galaxy Search <i>Chao Tang, Yihan Tao, Dongwei Fan, Shirui Wei, Chenzhou Cui and Changhua Li</i>	065011
Difficulties of Two Exploding White Dwarfs to Account for Type Ia Supernovae with Bimodal Nebular Emission Profiles <i>Jessica Braudo and Noam Soker</i>	065012
Pixel-level Modeling of Group-scale Strong Lens CASSOWARY 19 <i>Hengkai Ding, Yiping Shu, Yun Chen, Nan Li, Xiaoyue Cao et al.</i>	065013
Detecting Exomoons in Free-floating-planet Events from Space-based Microlensing Surveys <i>Haozhu Fu and Subo Dong</i>	065014
Test of Conformal Gravity as an Alternative to Dark Matter from the Observations of Elliptical Galaxies <i>Li-Xue Yue and Da-Ming Chen</i>	065015
Polarization Signals of Luminous Supernovae by Jet-driven Bipolar Explosions <i>Xudong Wen, Zongkai Peng and He Gao</i>	065016
Mapping Dust Attenuation at Kiloparsec Scales. II. Attenuation Curves from Near-ultraviolet to Near-infrared <i>Ruonan Guo, Cheng Li, Shuang Zhou, Niu Li, Tao Jing and Zhuo Cheng</i>	065017
An Interpretable Galaxy Morphology Classification Approach Using Modified SqueezeNet and Local Interpretable Model-agnostic Explanation <i>Kam Meng Goh, Derrick Hiang Yaol Lim, Zhen Dong Sham and Kolla Bhanu Prakash</i>	065018
Cubic Parametrization of the Deceleration Parameter Within $f(T)$ Gravity <i>D. D. Pawar, N. G. Ghungarwar and P. S. Gaikwad</i>	065019
Spectral and Temporal Properties of Ultraluminous X-Ray Source ULX-1 in NGC 4088 <i>P. Kangjam and A. S. Devi</i>	065020
Polarization Profiles of Globular Cluster Pulsars from FAST. I. 25 Profiles from Previously Known Pulsars <i>Tong Liu, Lin Wang and Zhichen Pan</i>	065021

Corrigendum

Corrigendum: "Optimizing the Input of Liouville Convolution Improves the 10 days Predictions of Polar Motion" (2025, RAA, 25, 055005) <i>Wei Miao, Xueqing Xu and Yonghong Zhou</i>	069501
